polyethylene seat & backrest

**C**

**C** Type 23A  
Upholstered insert seat  
& backrest

**D**

**D** Type 23B  
Fully upholstered seat  
& backrest

The increased platform depth and seats with backrests, provides the audience with more leg-room and greater seating comfort. The seat backrest simply folds down when units are retracted, ensuring savings in set-up time. The audience is seated at the front of the platform with their feet on the platform below.

Seats with backrests, padded and non-padded can be selected to fit the S20 platform. Minimum dimensions are shown using standard construction. Dimensions can be increased or decreased, to suit building requirements. Changing the rise will increase or decrease seat height and will affect comfort.

Platform coverings or special timber finishes can be selected to suit your requirements.
